Resusci Baby QCPR

High-performance training for infant resuscitation

Resusci Baby QCPR offers a new level of precision training for infant CPR skills and high-performance team training, enabling professional first responders to gain the confidence they need to act quickly during the high-stress experience of responding to an infant cardiac arrest.

Precise QCPR Feedback

Advanced Airway Management*

Intraosseous Infusion*

*optional feature

Resusci Baby QCPR + SkillReporter App – A powerful combination

The SkillReporter app for Android and iOS tablets includes objective feedback and precise measurement of all vital CPR parameters, helping healthcare responders train to perfection.
